Measurements were completed by UrbanMeasure Inc. in accordance with the RECA Residential Measurement Standard (RMS) at the time of inspection. The above-grade RMS area is reported separately from below-grade and other supplementary areas. Room dimensions are approximate and are provided for reference. Read this report together with any accompanying plans and noted limitations. Liability to the client is limited in accordance with our terms and conditions of service. Third parties must independently verify areas and dimensions prior to reliance.

MEASUREMENT GUIDE

URBAN MEASURE | PHOTOS

UNDERSTANDING THE NUMBER

What the RMS tells you

Developed by the Real Estate Council of Alberta (RECA), the RMS is adopted by real estate boards for consistent square footage. It applies to detached and semi-detached homes, rowhouses, townhomes and apartment-style condos.

UrbanMeasure has contributed technical expertise, industry insight and illustrative diagrams through multiple RMS committees since the standard began.

CORE PRINCIPLES

01 Exterior measurement
Detached, semi-detached and townhomes use the exterior wall at the foundation.

02 Apartment-style condos
Measured along the interior perimeter at floor level, paint to paint.

03 Perimeter, not rooms
Total RMS size is based on the applicable perimeter, not added room dimensions.

04 Grade classification
Grade is assessed on a level plane across the home. If any part of a floor is below grade, the entire floor is below grade, even on a sloped lot.

05 Unfinished areas
Above-grade unfinished area counts in RMS and must be labeled unfinished. Below-grade unfinished area is excluded from basement totals.

06 Under 5 ft
Any area with less than 5 ft of ceiling height is excluded from RMS size.

WHAT RMS EXCLUDES

- Open-to-below / vaulted voids
- Attached or detached garages
- Decks and patios
- Fireplace cantilevers
- Nonqualifying cantilevers
- Areas below height requirements
- Unfinished crawlspaces
- Three-season / unserviced sunrooms
