Step by step guide on accessing the Orthomosaic Map

Step 1: Download the Orthomosaic Map here: [Orthomosaic Map](#)

Step 2: Allow the file to download as it is a large file.

Step 3: Once downloaded, open it in Preview (if on a Mac) or Adobe Acrobat (if on a PC).

Step 4: Zoom in on the areas you would like to inspect, the map has been captured at 0.8 in/pixel, which means you will be able to see every detail on the map when you zoom in close enough.

If there are any questions or concerns with accessing the map, our contact information is at the top. Feel free to reach out with any questions.
