 20. single-family residence, including a unit in a common interest community as defined in MN Statute 515B.1-103,
 21. clause (10), regardless of whether the unit is in a common interest community not subject to chapter 515B.
 22. The seller disclosure requirements of MN Statutes 513.52 through 513.60 apply to the transfer of any interest in
 23. residential real estate, whether by sale, exchange, deed, contract for deed, lease with an option to purchase, or any
 24. other option.

25. **INSTRUCTIONS TO BUYER:** Buyers are encouraged to thoroughly inspect the property personally or have it
 26. inspected by a third party, and to inquire about any specific areas of concern. **NOTE:** If Seller answers "NO" to any of
 27. the questions listed below, it does not necessarily mean that it does not exist on the property, did not occur, or does
 28. not apply. "NO" may mean that Seller is unaware.

282. N. RADON DISCLOSURE: (The following Seller disclosure satisfies MN Statute 144.496.)

283. RADON WARNING STATEMENT: The Minnesota Department of Health strongly recommends that ALL homebuyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

287. Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling.

292. RADON IN REAL ESTATE: By signing this Statement, Buyer hereby acknowledges receipt of the Minnesota Department of Health's publication entitled Radon in Real Estate Transactions, which is attached hereto and can be found at www.health.state.mn.us/communities/environment/air/radon/radonre.html.

295. A seller who fails to disclose the information required under MN Statute 144.496, and is aware of material facts pertaining to radon concentrations in the Property, is liable to the Buyer. A buyer who is injured by a violation of MN Statute 144.496 may bring a civil action and recover damages and receive other equitable relief as determined by the court. Any such action must be commenced within two years after the date on which the buyer closed the purchase or transfer of the real Property.

329. **Q. WATER INTRUSION AND MOLD GROWTH:** Studies have shown that various forms of water intrusion affect
330. many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
331. leaving the home.

332. Examples of exterior moisture sources may be:

- 333. • improper flashing around windows and doors,
- 334. • improper grading,
- 335. • flooding,
- 336. • roof leaks.

337. Examples of interior moisture sources may be:

- 338. • plumbing leaks,
- 339. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 340. • overflow from tubs, sinks, or toilets,
- 341. • firewood stored indoors,
- 342. • humidifier use,
- 343. • inadequate venting of kitchen and bath humidity,
- 344. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 345. • line-drying laundry indoors,
- 346. • houseplants—watering them can generate large amounts of moisture.

347. In addition to the possible structural damage water intrusion may do to the Property, water intrusion may also result
348. in the growth of mold, mildew, and other fungi. Mold growth may also cause structural damage to the Property.
349. Therefore, it is very important to detect and remediate water intrusion problems.

350. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
351. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious
352. health problems, particularly in some immunocompromised individuals and people who have asthma or allergies
353. to mold.

354. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
355. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
356. Property inspected for moisture problems before entering into a purchase agreement or as a condition of your
357. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
358. Property.

359. **R. NOTICE REGARDING PREDATORY OFFENDER INFORMATION:** Information regarding the predatory
360. offender registry and persons registered with the predatory offender registry under MN Statue 243.166
361. may be obtained by contacting the local law enforcement offices in the community where the property
362. is located or the Minnesota Department of Corrections at (651) 361-7200, or from the Department of
363. Corrections web site at <https://coms.doc.state.mn.us/publicregistrantsearch>.

380. (11) an option to purchase a unit in a common interest community, until exercised;
381. (12) a transfer to a person who controls or is controlled by the grantor as those terms are defined with respect to a declarant under section 515B.1-103, clause (2);
382. (13) a transfer to a tenant who is in possession of the residential real property; or
383. (14) a transfer of special declarant rights under section 515B.3-104.

385. **MN STATUTES 144.496: RADON AWARENESS ACT**

386. The seller disclosure requirements of MN Statute 144.496 DO NOT apply to (1)-(9) and (11)-(14) above. Sellers

387. of newly constructed residential property must comply with the disclosure requirements of MN Statute 144.496.

388. **Waiver:** The written disclosure required under sections 513.52 to 513.60 may be waived if Seller and the prospective Buyer agree in writing. Waiver of the disclosure required under sections 513.52 to 513.60 does not waive, limit, or abridge any obligation for seller disclosure created by any other law.

391. **No Duty to Disclose:**

392. (A) There is no duty to disclose the fact that the Property
393. (1) is or was occupied by an owner or occupant who is or was suspected to be infected with Human Immunodeficiency Virus or diagnosed with Acquired Immunodeficiency Syndrome;
394. (2) was the site of a suicide, accidental death, natural death, or perceived paranormal activity; or
395. (3) is located in a neighborhood containing any adult family home, community-based residential facility, or nursing home.
396. (B) **Predatory Offenders.** There is no duty to disclose information regarding an offender who is required to register under MN Statute 243.166 or about whom notification is made under that section, if Seller, in a timely manner, provides a written notice that information about the predatory offender registry and persons registered with the registry may be obtained by contacting the local law enforcement agency where the property is located or the Department of Corrections.
399. (C) The provisions in paragraphs (A) and (B) do not create a duty to disclose any facts described in paragraphs (A) and (B) for property that is not residential property.
400. (D) **Inspections.**
401. (1) Except as provided in paragraph (2), Seller is not required to disclose information relating to the real Property if a written report that discloses the information has been prepared by a qualified third party and provided to the prospective buyer. For purposes of this paragraph, "qualified third party" means a federal, state, or local governmental agency, or any person whom Seller or prospective buyer reasonably believes has the expertise necessary to meet the industry standards of practice for the type of inspection or investigation that has been conducted by the third party in order to prepare the written report.
402. (2) Seller shall disclose to the prospective buyer material facts known by Seller that contradict any information included in a written report under paragraph (1) if a copy of the report is provided to Seller.

Radon in Real Estate Transactions

All Minnesota homes can have dangerous levels of radon gas. Radon is a colorless and odorless gas that comes from the soil. The gas can accumulate in the home. When inhaled, its radioactive particles can damage the lungs. Long-term exposure to radon can lead to lung cancer. About 21,000 lung cancer deaths each year in the United States are caused by radon.

The only way to know how much radon gas has entered the home is to conduct a radon test. MDH estimates 2 in 5 homes exceed the 4.0 pCi/L (picocuries per liter) action level. Whether a home is old or new, any home can have high levels of radon.

The purpose of this publication is to educate and inform potential home buyers of the risks of radon exposure, and how to test for and reduce radon as part of real estate transactions.

Disclosure Requirements

Effective January 1, 2014, the Minnesota Radon Awareness Act requires specific disclosure and education be provided to potential home buyers during residential real estate transactions in Minnesota.

Before signing a purchase agreement to sell or transfer residential real property, the seller shall provide this publication and shall disclose in writing to the buyer:

1. whether a radon test or tests have occurred on the property
2. the most current records and reports pertaining to radon concentrations within the dwelling
3. a description of any radon levels, mitigation, or remediation
4. information on the radon mitigation system, if a system was installed
5. a radon warning statement

Radon Facts

How dangerous is radon? Radon is the number one cause of lung cancer in nonsmokers, and the second leading cause overall. Your risk for lung cancer increases with higher levels of radon, prolonged exposure, and whether or not you are a current smoker or former smoker.

Where is your greatest exposure to radon? For most Minnesotans, your greatest exposure is at home where radon can concentrate indoors.

What is the recommended action based on my results? If the average radon in the home is at or above 4.0 pCi/L, the home's radon level should be reduced. Also, consider mitigating if radon levels are between 2.0 pCi/L and 3.9 pCi/L. Any amount of radon, even below the recommended action level, carries some risk. A home's radon levels may change in the future, so test every 2–5 years, or sooner if there is major remodeling or changes to the foundation, heating, cooling, or ventilation.

Radon Warning Statement

“The Minnesota Department of Health strongly recommends that ALL home buyers have an indoor radon test performed prior to purchase or taking occupancy, and recommends having the radon levels mitigated if elevated radon concentrations are found. Elevated radon concentrations can easily be reduced by a qualified, certified, or licensed, if applicable, radon mitigator.

Every buyer of any interest in residential real property is notified that the property may present exposure to dangerous levels of indoor radon gas that may place the occupants at risk of developing radon-induced lung cancer. Radon, a Class A human carcinogen, is the leading cause of lung cancer in nonsmokers and the second leading cause overall. The seller of any interest in residential real property is required to provide the buyer with any information on radon test results of the dwelling.”

Radon Testing

Any test lasting less than three months requires **closed-house conditions**. Closed-house conditions include keeping all windows and doors closed, except for normal entry and exit, and temperature set to 65 – 80 °F. For a full list of closed-house conditions please visit mn.gov/radon/notice.

Before testing: Begin closed-house conditions at least 12 hours before the start of the radon test.

During testing: Maintain closed-house conditions during the entire duration of the short-term test. Operate home heating or cooling systems normally during the test.

Where should the test be conducted? Any radon test conducted for a real estate transaction needs to be placed in the lowest livable area of the home suitable for occupancy. This is typically in the basement, whether finished or unfinished. If other foundations are present, such as a crawl space or slab on grade, also test the rooms above these foundations.

Place the test kit:

- 20 inches to 6 feet above the floor
- 3 feet from exterior doors and windows
- 1 foot from exterior walls
- away from heat sources and drafts caused by vents and fans
- not in enclosed areas or areas of high heat/humidity

How are radon tests conducted in real estate transactions?

There are special protocols for radon testing in real estate transactions. Because these tests are time-sensitive there are two testing options. For both tests, test for a minimum of 2 days.

Continuous Radon Monitor (CRM)

MDH recommends CRMs in real estate testing. CRMs are calibrated, provide more data, and may detect tampering. The average of the results are used to make a decision to mitigate.

Simultaneous Short-Term Testing

Two short-term test kits are placed side by side, 4" – 8" apart. The results of the two tests are averaged and used to make a decision to mitigate.

Radon Mitigation

When elevated levels of radon are found, they can be easily reduced by a licensed professional.

Radon mitigation is the process or system used to reduce radon concentrations in the breathing zones of occupied buildings. The goal of a radon mitigation system is to reduce the indoor radon levels to below the action level. This is done by drawing soil gas from under the house and venting it above the roof. A quality mitigation system is often able to reduce the annual average radon level to below 2.0 pCi/L. The cost of a radon mitigation system averages \$1,500 to \$3,000.

After a radon mitigation system is installed perform an independent short-term test to ensure the reduction system is effective. Operate the radon system during the entire test. This short-term test will confirm low levels in the home. Be sure to retest the house every two years to confirm continued radon reduction.

All radon testing and mitigation should be conducted by licensed radon professionals. Radon service providers, such as home inspectors, must be licensed. A list of these licensed radon professionals can be found at MDH's radon web site. MDH conducts free inspections, upon request, of recently installed radon mitigation systems, to check that they meet requirements.
