SHOWING NOTES:

Aside from the closets in every room, there is so much storage with this unit, it is really unbelievable!

Behind the couch is a crawl space that covers the area under the dining room and the entrance. There is a trap door in the closet with the hot water tank, and it leads to storage under the living room. The space under the deck outside has the added bonus of being (mostly) waterproofed from above. As if that is not enough, there is a locker in the parking garage!
