**PRIVATE SEWERAGE SYSTEMS**

**SELLER OF RESIDENTIAL REAL ESTATE:** Complete this disclosure document if city, town, or municipality waste treatment does **not** serve the property described herein.

Improperly treated or partially treated residential sewage poses significant risks to human health and to the environment. Untreated or poorly treated water contains parasites, bacteria, and viruses that cause serious disease. D.H.H Title 51, Subsection 707 states: "Individual sewerage systems shall be kept in service and in serviceable condition sufficient to ensure compliance with this code and in order to avoid creating or contributing to a nuisance or public health hazard."

**HEALTH HAZARDS AND DISEASES**

**Gastroenteritis** – severe inflammation of the intestines that may cause severe vomiting and diarrhea leading to dehydration.

**Severe infection** – result of contact with untreated water where there are cuts or abrasions on the skin.

**Hepatitis** – serious infection of the liver that can lead to long term illness.

A residential sewerage treatment system that is not properly operated or maintained may also result in the pooling of improperly treated water at the surface. **Health risks also exist from mosquito infestations that may cause West Nile Virus, Encephalitis, and other diseases. Improperly operating systems may be subject to fines and penalties under Louisiana law.**

## PRIVATE WATER WELLS

### Inspection

In Louisiana, private water wells are largely unregulated, leaving property owners responsible for any maintenance, care, or testing of their wells. Further, lenders may require varying testing and inspection(s)

of wells for real estate transfers. Accordingly, Buyers are advised to ask their lender whether an inspection(s) or other testing is required as a condition of financing. Additional information regarding private water well testing and the Louisiana Private Well Initiative may be found by calling 1-888-293-7020 or at: [Louisiana Well Owner Network](#).

### Registration

Newly constructed and other water wells are typically required by law to be registered with the Louisiana Department of Natural Resources, Office of Conservation ("Department"), within certain time periods following construction completion. Additionally, the Department encourages owners of older, reworked wells and / or un-registered water wells, which were constructed prior to November 1, 1985, to contact the agency regarding well registration. Additional information can be found at: [Office of Conservation](#).
