ENGINEERED SOLUTIONS OF GEORGIA PROPOSES TO FURNISH AND INSTALL THE FOLLOWING SCOPE OF WORK:

- Waterproofing Structural Repairs Pressure Grouting

INSTALL (5) CARBON FIBER/KEVLAR WALL BRACING STRAPS WITH TOP RESTRAINTS ON LEFT WALL IN UNFINISHED BASEMENT:

1. Prep area and cover personal items with plastic.
2. Grind clean a section of the block wall 5.5 inches wide from top of wall to floor elevation.
3. Install top restraint bracket mechanically fastened to rim joist.
4. Apply a base coat of epoxy.
5. Embed carbon fiber weave into wet epoxy and remove air to cure.
6. Epoxy all cracks on left foundation wall in unfinished area.
7. Clean up all construction related debris.

MORTAR REPAIR TO BRICK AT FRONT LEFT CORNER OF HOME:

1. Grind out existing mortar where cracks are located.
2. Install new mortar / tuck point as needed.

NOTES:

- 1) Engineering is included in this proposal and engineer will have final say so on the scope of work to repair wall.
- 2) Above structural repairs carry a transferable life of the structure warranty, see terms and conditions for additional notes.
- 3) New mortar may not be an exact match due to age of existing brick mortar.

Applicable Warranty – see terms and conditions in the attached warranty addendum

- Waterproofing Warranty Structural Warranty Triple Protection Warranty
