Sewer Scope 111 N 97th St, Seattle, WA 98103 Technician accessed the line from pulled toilet in the downstairs bathroom. Line begins in 4" cast iron. At approximately 5' the line transitions to 4" pvc plastic. At approximately 7' the line transitions to 4" concrete. At approximately 30' the line transitions to 6" concrete. Line ties into the city main at approximately 81'. The concrete seems to be fair condition but there are some very minor root intrusions beginning to grow into the 6" portion of the line. Techs recommend scoping the line again in 2-3 years in order to check up on the health of the line as well as the growth of the roots. Tech believes there is a cleanout on the exterior of the home along the porch on the right side when facing the front door, but it appears to either be under the paver stones or buried in the dirt.	1.0	\$275.00	\$275.00
Sewer Scope Legality Sewer Scope Legality - sewer inspection legality - Sewer inspections cannot be guaranteed. What we interpret today is what we see at this time. Things in the line can change due to many reasons. Sewer inspections do not guarantee any issues or problems that may arise in the future.	1.0	\$0.00	\$0.00
