Letter of Full Initial Inspection Compliance

Dear Owners,

This letter is to certify that I inspected your property at 17 FIFTH AVE - apt. #1 - 1st floor, and relevant common areas, in the City of Worcester, for dangerous levels of lead according to 105 CMR 460.730 (A) through (F): Procedures for Initial Inspection, Regulations for Lead Poisoning Prevention and Control, and determined that there were No Violations. The Inspection was conducted on November 30, 1999.

Please be advised that Massachusetts's Law requires that only certain residential surfaces be free of Lead Paint. Thus, this letter does not mean that your property contains no lead paint. The premises or dwelling unit and relevant common areas shall remain in compliance only as long as there continues to be no peeling, chipping, or flaking lead paint or other accessible materials and as long as coverings, forming an effective barrier over such paint, remain in place.

Karen Orberg C 2613
Inspector Registration Number

Should you have any questions about this letter, call the Department of Public Health and Code Enforcement at 799-8589.

Sincerely,

James G. Gardiner
