Homeowners Association

A GUIDE TO

ARCHITECTURAL PROJECTS

ALL EXTERIOR CHANGES REQUIRE PRIOR APPROVAL

There are many exciting possible home improvements! To assist in this process, homeowners are provided guidelines and regulations for applying for Architectural Changes.

THE PROCESS

Applications are submitted to the management team via the HOA Portal, or by sending directly via email or post.

The team confirms applications are complete before submitting to the Architectural Review Board to be reviewed within a 30-day window.

TRASH CAN SCREENS

Required if storing cans on the side of your single family home. Options include landscape or solid screening that matches the material and quality of the siding installed on the home. Preferably located at least 10ft back from front corner of home.

SOLAR PANELS

Solar Panels should not be visible from the street. Solar Panels shall be located on the rear of the structure and the roof surface sloping downward toward the rear of the home.

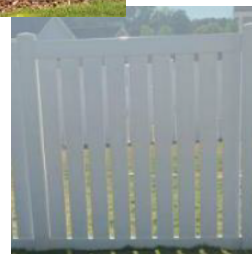

FENCING

White vinyl semi-private fencing from 5' to 6' in height or black wrought iron or aluminum powder coated picket fencing 4' to 5' in height is allowed.

WHAT TO INCLUDE IN MY APPLICATION

Requested materials for each project may differ, but every Application requires:

- + A Completed Application Form
- + Relevant Photos of the Project and Area
- + A Plat Survey with Location and Dimensions
- + Supporting Narrative Description Including: Materials, Colors, Style, Etc.
