Monroe, WA 98272
Parcel 004274-000-006-02

As per your request I have evaluated the soil on the above referenced property to determine the feasibility of installing an onsite sewage disposal system in accordance with Snohomish County Health Department regulations for on-site septic system.

It is my opinion that at this time the above referenced property will meet current code for an onsite sewage system for a low pressure or possible gravity system for 5+ bedrooms. The soil is good and the septic can be placed in multiple locations on the lot to accommodate a new house on the parcel. Also, a well could be drilled if city water is not available for this parcel.

Please be aware that this opinion applies only to the conditions on the property as they presently exist. Further, this letter does not constitute nor imply official County action of any kind. The ultimate acceptability of the site can only be determined by the Snohomish Health district.

If you require any further information, please do not hesitate to call or Email me.

Sincerely,

Craig Whalen
