New Furnace / AHU Installed?

☒ Yes

Furnace / AHU Specifications Label
Picture:

Furnace / AHU Installed Picture:

Indoor Overview

Picture of the indoor HVAC components showcasing: Tape lines and zip-tied wires for a clean appearance. Secured on new blocks. Armor flex insulation on refrigerant lines. Proper application of mastic for air sealing. Properly installed and functional 3x safety float switches. Clear and blown-out drain lines, treated as needed. Use of Rx-11 for cleaning. Romex connectors secured. Filter drier installed by the coil. Copper lines paired together. At least 1' clearance from combustible materials. Flue pipe angled uphill, properly supported, and secured:

Outdoor Overview

Picture of the outdoor HVAC components showcasing: Level condenser on a level pad. Properly routed conduit for low-voltage wiring. Level disconnect box with penetration sealing. Drain line extended appropriately. At least 12" clearance from walls, shrubs, or gas meters. Armor flex insulation on lines. Locking caps installed for security. Copper lines securely fixed and supported. Silicone sealing on disconnect box. Breaker size matched system requirements:

Vacuum pulled to <500 microns?

☒ Yes

Pressure completed and tested to manufacturer specifications?

☒ Yes

Nitrogen purge during brazing, followed by vacuum and charge verification?

☒ Yes

Charge completed and tested to manufacturer specifications for optimal performance?

☒ Yes

Charge sub-cool reading per specifications:

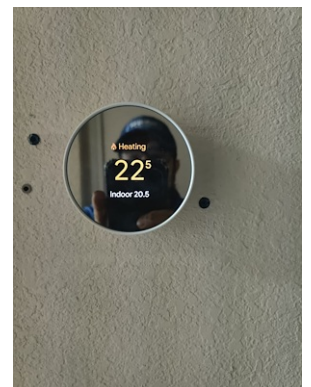

Yes

Thermostat installed, working, connected to Wifi, & customer walk through completed?

☒ Yes

Thermostat

New thermostat installed, working, connected to Wifi, & customer walk through completed:

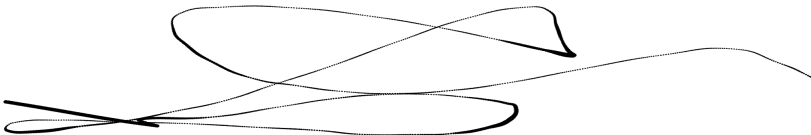

Completed and tested all stages; cooling, heating, & zoning for optimal performance & customer satisfaction?

☒ Yes

Additional Installation: Return Plenum?

☒ NA

Additional Installation: Supply Plenum? <input checked="" type="checkbox"/> NA	Additional Installation: Media Cabinet? <input checked="" type="checkbox"/> NA

Additional Installation: Duct Work? <input checked="" type="checkbox"/> NA	Additional Installation: IAQ? <input checked="" type="checkbox"/> NA
Job Site Cleanliness All debris and trash removed from the site at the end of the job. Work areas swept or vacuumed to ensure a clean finish. Drop cloths or protective coverings used and removed appropriately. Tools and equipment neatly organized and not scattered across the site. Proper storage of tools when not in use to prevent hazards. All tools removed from the job site upon completion of the work. Floors, walls, and surrounding areas protected from scratches, dents, or stains during installation. Furniture and personal items properly moved or covered as needed. HVAC system components installed without causing damage to the customer's property. Outdoor areas, such as landscaping, left intact and undisturbed. Walkthrough completed to ensure no damage or debris is left behind. Any issues or concerns communicated to the customer and documented. Customer acknowledgment of a clean and damage-free job site. <input checked="" type="checkbox"/> Yes	If No, Why? -
Technician Signature I hereby acknowledge that I completed the HVAC QA Checklist in accordance with the standards set forth by Honest Plumbing & Air. I affirm that : (1) Each step in the checklist has been reviewed and completed (2) The completed system has been inspected for quality assurance, ensuring it meets customer satisfaction and operational standards (3) provided the customer with all necessary information, including operating instructions, warranty details, and follow-up contact information for future support. By signing below, I affirm the accuracy and integrity of the information provided and quality of the completed work
