RUNWAY
16/34 TURF

PILOT OPERATIONS

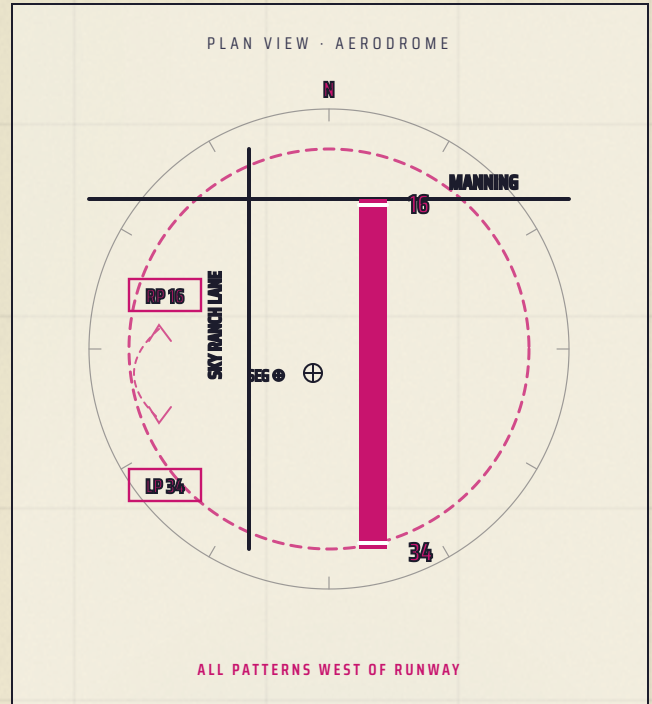

- 01 Call "Sky Ranch Traffic" on CTAF 122.9 — chart name reads "Flathead Lake Sky Ranch."
- 02 All traffic west of the runway. Two private strips lie east; we stay separated.
- 03 RP 16 · Right traffic for Runway 16.
- 04 LP 34 · Left traffic for Runway 34.
- 05 TPA 4,000 MSL. Neighboring strips fly 3,800 — we fly higher.
- 06 Pilot-controlled lighting at south end: 123.9, 3 to 5 clicks.
- 07 Segmented circle at the middle wind sock.

⚠ CHART OVERRIDE

One nav app still routes traffic east of the field. It is incorrect. This page supersedes any electronic chart for pattern side.

HAZARDS & CONDITIONS

- 01 Deer, geese, and migratory birds frequent the runway and vicinity.
- 02 No buzzing pedestrians.
- 03 Surface unreliable in winter/spring melt-off and after heavy rain — verify with a local owner before arrival.

NOTICE TO RESIDENTS

Active airport. Aircraft noise and low-flying traffic.

- ▶ Walk the east-side path; stay off the runway unless pilot-experienced.
- ▶ Dogs under control near the runway at all times.
- ▶ Hand this page to any guest pilot flying in.
